
Samuel (WonHo) Jung

FRONT-END ENGINEER

SUMMARY

They nicknamed me "Sonic" because of how fast I was able to deliver projects ahead of schedule. I'm a gold medal effort, Frontend Developer with over 2 years experience turning feedback into custom solutions, proactively identifying bottlenecks, & spearheading mobile applications that are streamlined for performance, speed, & efficiency.

Ibperarson, Computer Support
2018 - 2020

EXPERIENCE

FRONTEND DEVELOPER

Decibel Ads

Sept 2021 - June 2023

- Hand-code embedded an example ads audio library & an ads forecasting tool into the website's that enabled 300+ users to predict the potential success of their ads.
- Worked hand-in-hand with the CTO to perform - routine updates & other website maintenance tasks.
- Developed the fully responsive mobile website using MUI.
- Based on HotJar analytics, collaborated with the Marketing Department's Director to address user drop in the app, & devised a plan to reduce the onboarding process by 60%.
- Converted client's Google Sheet Data (with 10,000+ input items) into JSON and assisted in coordinating advanced audience target options.
- Directed the V3 launch of the website, 5 days before the anticipated deadline, which was the deciding factor in signing 2 major clients to the organization.
- Engineered an updated userflow with input actions that gave the user, targeting control in - geo search, dayparting, reusable design components, distribution options & more.
