# Samuel (WonHo) Jung

FRONT-END ENGINEER

SUMMARY

They nicknamed me "Sonic" because of how fast I was able to deliver projects ahead of schedule. I'm a gold medal effort, Frontend Developer with over 2 years experience turning feedback into custom solutions, proactively identifying bottlenecks, & spearheading mobile applications that are streamlined for performance, speed, & efficiency.

- Redux
- Unstated-Next
- MUI
- RestAPIs
- Figma
- Firebase
- Jira / Linear / Pivotal tracker

EDUCATION

Ibperarson, Computer Support

2018 - 2020

EXPERIENCE

FRONTEND DEVELOPER

Decibel Ads

Sept 2021 - June 2023

- Front-end developer at Decibel Ads, contributing to the development and improvement of the Decibel app from its first version to Decibel Version 3.

- Implemented responsive design, making the Decibel app fully compatible and user-friendly across mobile devices.

- Designed and built new flow steps, including Geo search, Dayparting selector, and reusable design components, enhancing ad creation capabilities.

- Developed a password reset function, improving security and user convenience.

- Embedded a forecasting tool and example audio ads library into the landing page, increasing traffic and engagement.

- Utilized Algolia search to improve search speed and enhance the overall user experience.

- Created an independent "Try it out" section on the landing page, providing users with a preview of 27 types of ads. Leveraged Firebase storage to enable this feature without requiring users to create a campaign.

- Analyzed user data and implemented strategies to reduce user drop-off, improving user retention and engagement.
